

July 21, 2015

To Our Valued Masonite Architectural Customers:

Consistent with recent years, the past year presented our business with price increases in raw materials as well as other inflationary costs of doing business. While we have made every effort to offset these increases through various cost saving initiatives and manufacturing efficiencies, we have not been able to keep up with the rate of these rising costs; and as a result we have found it necessary to revise pricing on cores and components included in door constructions for project quotes. Specific pricing impacts will vary depending on door configurations; however, **we expect these increases to be in the 5-7% range.** Revised pricing will be implemented and reflected in quotes throughout the third quarter (July – September) of 2015.

We remain dedicated to driving more value into the products and services we offer to our channel partners and collaborating to grow our mutual businesses. We sincerely appreciate your continued support and look forward to servicing your future commercial and architectural wood door needs.

Respectfully yours
